

# Inglês Técnico 1 — Exercícios Práticos

## Tempos verbais, interpretação de textos e vocabulário técnico

Material organizado para prática progressiva: exercícios primeiro e gabarito comentado ao final.

## Como utilizar este material

Tente resolver todos os exercícios antes de consultar o gabarito. Nos exercícios de produção, respostas equivalentes podem estar corretas desde que mantenham o tempo verbal e a estrutura solicitados.

Legenda dos principais tempos: Present Continuous = ação acontecendo agora; Simple Present = rotina, fato ou característica; Simple Past = ação ou situação no passado.

# 1. Present Continuous — Affirmative Form

**Estrutura:** Subject + am/is/are + verb + -ing

Exemplo: The technician is checking the computer.

## Exercício 1 — Complete com am, is ou are

- a) The computer \_\_\_ running.
- b) The technicians \_\_\_ installing the software.
- c) I \_\_\_ studying computer science.
- d) The server \_\_\_ processing the data.
- e) We \_\_\_ learning English.

## Exercício 2 — Coloque o verbo no Present Continuous

- a) The technician \_\_\_\_\_ the network. (check)
- b) The computer \_\_\_\_\_ the file. (process)
- c) They \_\_\_\_\_ a new application. (develop)
- d) I \_\_\_\_\_ a technical text. (read)
- e) The server \_\_\_\_\_ information. (send)

## Exercício 3 — Transforme para Present Continuous

Exemplo: The technician works on the computer. → The technician is working on the computer.

- a) The programmer develops an application.
- b) The student studies English.
- c) The computer processes the data.
- d) The technician installs the program.
- e) The users access the system.

## Exercício 4 — Escolha a alternativa correta

- a) The computer: ( ) is running ( ) are running
- b) The technicians: ( ) is installing ( ) are installing
- c) I: ( ) am studying ( ) is studying
- d) The server: ( ) are processing ( ) is processing
- e) We: ( ) am learning ( ) are learning

## Exercício 5 — Questão-base

A technician is working in a computer laboratory. He is installing a new operating system. Two students are watching the installation process.

Escreva 5 frases em Present Continuous descrevendo o que está acontecendo na situação.

# 2. Simple Present — Affirmative, Interrogative and Negative

**Affirmative:** I/You/We/They work. — He/She/It works.

**Negative:** I/You/We/They do not (don't) work. — He/She/It does not (doesn't) work.

**Interrogative:** Do I/you/we/they work? — Does he/she/it work?

### **Exercício 1 — Complete**

- a) The computer \_\_\_ data. (process)
- b) The technicians \_\_\_ computers. (repair)
- c) The server \_\_\_ information. (store)
- d) Software developers \_\_\_ applications. (create)
- e) A computer \_\_\_ instructions. (execute)

### **Exercício 2 — Passe para a forma negativa**

- a) The computer processes data.
- b) The technician repairs the server.
- c) The system stores information.
- d) The programmer develops software.
- e) The computer uses electricity.

### **Exercício 3 — Passe para a forma interrogativa**

- a) The computer processes data.
- b) The technician repairs computers.
- c) The server stores information.
- d) The programmer develops software.
- e) The system uses an operating system.

### **Exercício 4 — Complete com do ou does**

- a) \_\_\_ you use Linux?
- b) \_\_\_ the computer process data?
- c) \_\_\_ technicians repair servers?
- d) \_\_\_ the system store information?
- e) \_\_\_ programmers write code?

### **Exercício 5 — Questão-base**

A computer processes information. It uses hardware and software to perform different tasks. A technician maintains the computer and checks the system regularly.

Responda: a) Does a computer process information? b) Does a computer use hardware? c) Does a technician maintain the computer? d) Does a technician check the system? e) Transforme "A computer processes information" para negativa.

## **3. Simple Past — Verb To Be**

No passado: I/he/she/it → was; you/we/they → were. Negativa: wasn't / weren't. Interrogativa: Was...? / Were...?

### **Exercício 1 — Complete com was ou were**

- a) The computer \_\_\_ very large.
- b) The first computers \_\_\_ expensive.
- c) ENIAC \_\_\_ a famous computer.

- d) The machines \_\_\_ very slow.
- e) The technicians \_\_\_ responsible for maintenance.

### **Exercício 2 — Passe para a forma negativa**

- a) The computer was large.
- b) The machines were cheap.
- c) ENIAC was small.
- d) The technicians were students.
- e) The computers were fast.

### **Exercício 3 — Passe para a forma interrogativa**

- a) The computer was expensive.
- b) The machines were large.
- c) ENIAC was a computer.
- d) The technicians were responsible.
- e) The computers were reliable.

### **Exercício 4 — Complete**

- a) \_\_\_ ENIAC a modern computer?
- b) \_\_\_ the first computers large?
- c) \_\_\_ the machines expensive?
- d) \_\_\_ the technician responsible for maintenance?
- e) \_\_\_ the computers reliable?

### **Exercício 5 — Questão-base**

The first computers were very large. They were expensive and consumed a lot of electricity. ENIAC was one of the famous computers of the first generation. It was developed in the 1940s.

Responda: a) Were the first computers small? b) Were they expensive? c) Was ENIAC a computer? d) Was ENIAC from the first generation? e) Passe "The first computers were large." para negativa.

## **4. Simple Past — Regular Verbs**

Para verbos regulares, normalmente acrescentamos -ed: work → worked; develop → developed; install → installed; use → used; process → processed.

### **Exercício 1 — Coloque os verbos no Simple Past**

- a) The technician \_\_\_\_\_ the computer. (repair)
- b) The programmer \_\_\_\_\_ an application. (develop)
- c) The company \_\_\_\_\_ a new system. (use)
- d) The technician \_\_\_\_\_ the software. (install)
- e) The computer \_\_\_\_\_ the information. (process)

### **Exercício 2 — Complete com o verbo no passado**

- a) The technician \_\_\_ the system yesterday. (check)
- b) The programmer \_\_\_ the application last week. (develop)

- c) The user \_\_\_ the software. (install)
- d) The computer \_\_\_ the information. (process)
- e) The company \_\_\_ a new system. (create)

### **Exercício 3 — Identifique o verbo no passado e escreva o infinitivo**

- a) The technician worked on the server.
- b) The programmer developed a new application.
- c) The computer processed the information.
- d) The company created a new system.
- e) The technician installed the software.

### **Exercício 4 — Complete usando worked, installed, developed, checked, created**

- a) The technician \_\_\_\_\_ the computer.
- b) The programmer \_\_\_\_\_ a new application.
- c) The technician \_\_\_\_\_ the network.
- d) The company \_\_\_\_\_ new software.
- e) The developer \_\_\_\_\_ on the project.

### **Exercício 5 — Questão-base**

Last Monday, a technician worked in the computer laboratory. He checked the computers and installed new software. Later, he tested the system and created a technical report.

Responda em inglês: a) When did the technician work in the laboratory? b) What did he check? c) What did he install? d) What did he test? e) What did he create?

## 5. Text — Generations of Computers

First Generation (1940–1956): Vacuum tubes were used for circuitry and magnetic drums for memory. These computers were room-sized, expensive, generated massive heat and consumed a lot of electricity. They used machine language (binary), with punched cards and paper tape for input/output. Examples include ENIAC and UNIVAC. Second Generation (1956–1963): Transistors replaced vacuum tubes. Computers became smaller, faster, cheaper and more reliable. Assembly language and early high-level languages such as COBOL and FORTRAN were used. Third Generation (1964–1971): Integrated circuits (ICs) on silicon chips became the core technology. Computers became smaller and operating systems and multitasking were introduced. Keyboards and monitors replaced punch cards. Fourth Generation (1971–Present): Microprocessors enabled personal computers, graphical user interfaces (GUIs), handheld devices and the Internet. Keyboards, mice and screens became common input/output devices. Fifth Generation (Present and Beyond): Artificial intelligence (AI), parallel processing and ultra-large scale integration are important technologies. Systems can learn, process natural language and reason. Smartphones, voice assistants and cloud-connected hardware are examples.

### Exercício 1 — True or False

- a) The first generation used vacuum tubes.
- b) The first generation used microprocessors.
- c) The second generation used transistors.
- d) The third generation used integrated circuits.
- e) The fourth generation enabled personal computers.

### Exercício 2 — Complete

- a) The first generation used \_\_\_\_\_ tubes.
- b) The second generation used \_\_\_\_\_.
- c) The third generation used integrated \_\_\_\_\_.
- d) The fourth generation used \_\_\_\_\_.
- e) The fifth generation uses artificial \_\_\_\_\_.

### Exercício 3 — Relacione

- 1. First — ( ) Microprocessors
- 2. Second — ( ) Artificial Intelligence
- 3. Third — ( ) Transistors
- 4. Fourth — ( ) Vacuum tubes
- 5. Fifth — ( ) Integrated circuits

### Exercício 4 — Responda

- a) What technology did the first generation use?
- b) What was one characteristic of first-generation computers?
- c) What replaced vacuum tubes in the second generation?
- d) What did the third generation introduce?
- e) What technologies are associated with the fifth generation?

### Exercício 5 — Questão-base

Escreva 5 frases em inglês, uma sobre cada geração. Depois transforme duas das suas frases para o passado usando was / were / used / developed / introduced.

## 6. Text — The First Americans

North American Indians lived in the “New World” a long time before Europeans arrived there. Many centuries before Columbus, Indians hunted, fished and planted corn in America. They killed the buffalo for food. They fished for salmon in the rivers of Canada and they farmed the land in Arizona. Before the white men arrived, the Indians lived in peace. They were the masters of the North American continent.

### Exercício 1 — True or False

- a) North American Indians lived in the New World before Europeans arrived.
- b) They arrived after Columbus.
- c) They hunted and fished.
- d) They planted corn.
- e) They lived in peace before the Europeans arrived.

### Exercício 2 — Complete

- a) The Indians lived in the \_\_\_\_\_ World.
- b) They hunted \_\_\_\_\_.
- c) They fished for \_\_\_\_\_ in Canadian rivers.
- d) They planted \_\_\_\_\_ in America.
- e) They farmed the land in \_\_\_\_\_.

### Exercício 3 — Vocabulário

Relacione: 1. hunted 2. fished 3. planted 4. farmed 5. lived

- a) cultivaram b) pescaram c) viveram d) caçaram e) plantaram

### Exercício 4 — Responda em inglês

- a) Where did the North American Indians live?
- b) What did they hunt?
- c) What did they fish for?
- d) What did they plant?
- e) Did they live in peace before Europeans arrived?

### Exercício 5 — Questão-base

Retire do texto: a) 3 verbos no Simple Past; b) 3 substantivos relacionados à natureza/alimentação; c) 2 expressões relacionadas a localização; d) escreva 3 novas frases no Simple Past usando os verbos encontrados.

## 7. Text — They Lived in Peace

North American Indians lived in the “New World” a long time before Europeans arrived there. Many centuries before Columbus, Indians hunted, fished and planted corn in America. They killed the buffalo for food. They fished for salmon in the rivers of Canada and they farmed the land in Arizona. Before the white men arrived, the Indians lived in peace. They were the masters of the North American continent.

### Exercício 1 — Complete

- a) North American Indians \_\_\_\_\_ in the New World.
- b) They \_\_\_\_\_ buffalo for food.
- c) They \_\_\_\_\_ for salmon.

d) They \_\_\_\_\_ corn.

e) They \_\_\_\_\_ in peace.

Use: lived — hunted — fished — planted — lived

### **Exercício 2 — Encontre no texto**

Encontre 5 verbos no passado; 3 substantivos; 2 lugares; 1 expressão relacionada a tempo; 1 expressão relacionada à paz.

### **Exercício 3 — Passe para a negativa**

a) Indians lived in the New World.

b) They hunted buffalo.

c) They fished for salmon.

d) They planted corn.

e) They lived in peace.

Atenção: utilize didn't + verbo na forma base.

### **Exercício 4 — Passe para interrogativa**

a) Indians lived in the New World.

b) They hunted buffalo.

c) They fished for salmon.

d) They planted corn.

e) They lived in peace.

Exemplo: They hunted buffalo. → Did they hunt buffalo?

### **Exercício 5 — Questão-base**

Responda em inglês: a) Who lived in the New World? b) When did they live there? c) What did they hunt? d) What did they fish for? e) Where did they farm the land? f) Did they live in peace? g) Who arrived later in America?

## 8. Texto adicional — The Evolution of Technology

Computers changed significantly over the years. Early computers were large and expensive. They used vacuum tubes and consumed a lot of electricity. Later, engineers developed smaller and faster computers. Transistors replaced vacuum tubes, and integrated circuits improved computer performance. Today, computers are smaller, faster and more powerful. People use computers for work, study, communication and entertainment. Modern devices also use artificial intelligence to process information and perform different tasks.

### Exercício 1 — True or False

- a) Early computers were small.
- b) Early computers were expensive.
- c) Transistors replaced vacuum tubes.
- d) Modern computers are slower.
- e) AI can process information.

### Exercício 2 — Encontre no texto

a) 5 verbos no Simple Past. b) 3 verbos no Simple Present. c) 5 palavras relacionadas à tecnologia.

### Exercício 3 — Responda

- a) What did early computers use?
- b) What replaced vacuum tubes?
- c) What improved computer performance?
- d) What do people use computers for?
- e) What can AI do?

### Exercício 4 — Transformação

Use "People use the Internet to communicate." como modelo: faça a forma negativa e interrogativa. Depois faça o mesmo com "AI processes information."

### Exercício 5 — Produção

Escreva 5 frases sobre a evolução dos computadores: 2 no Simple Past, 2 no Simple Present e 1 no Present Continuous.

## 9. Texto adicional — A Computer Technician

John is a computer technician. He works in a small technology company. Every morning, he checks the computers and the network. He also helps users with technical problems. Today, John is installing new software on several computers. He is checking the network connection and testing the new system. Yesterday, John repaired a computer and installed an operating system. He also checked the network and created a technical report.

### Exercício 1 — Identifique o tempo verbal

- a) John works in a technology company.
- b) He is installing new software.
- c) John repaired a computer.
- d) He checks the computers.
- e) He created a technical report.

Use: Simple Present / Present Continuous / Simple Past.

### **Exercício 2 — Complete**

- a) John \_\_\_ a computer technician.
- b) He \_\_\_ in a technology company.
- c) Today, he \_\_\_ installing software.
- d) Yesterday, he \_\_\_ a computer.
- e) He \_\_\_ a technical report.

### **Exercício 3 — Transforme para negativa**

- a) John works in a technology company.
- b) He checks the computers.
- c) John repaired a computer.

### **Exercício 4 — Transforme para interrogativa**

- a) John works in a technology company.
- b) He checks the network.
- c) John repaired a computer.

### **Exercício 5 — Questão-base**

Escreva 6 frases sobre John: 2 no Simple Present, 2 no Present Continuous e 2 no Simple Past.

## **10. Texto adicional — The Internet**

The Internet is an important part of modern life. People use it to communicate, study, work and access information. In the past, communication was slower. People used letters and telephones to communicate with other people. Later, computers and the Internet changed communication. Today, people are using smartphones and computers to communicate instantly. They are sending messages, making video calls and sharing information around the world.

### **Exercício 1 — True or False**

- a) The Internet is important in modern life.
- b) People use the Internet only for entertainment.
- c) Communication was slower in the past.
- d) People used letters to communicate.
- e) People are using smartphones today.

### **Exercício 2 — Separe os verbos por tempo verbal**

Retire do texto: Simple Present — 3 verbos; Simple Past — 3 verbos; Present Continuous — 3 verbos.

### **Exercício 3 — Complete**

- a) People \_\_\_ the Internet to communicate.
- b) Communication \_\_\_ slower in the past.
- c) People \_\_\_ letters in the past.
- d) Today, people \_\_\_ using smartphones.
- e) They \_\_\_ sharing information around the world.

### **Exercício 4 — Transformação**

Para “People use the Internet to communicate.” faça affirmative, negative e interrogative.

Depois faça o mesmo com “People are using smartphones.”

### **Exercício 5 — Questão-base**

Responda em inglês: a) Why is the Internet important? b) How did people communicate in the past? c) What changed communication? d) What are people using today? e) What are people doing with smartphones and computers?

# GABARITO COMENTADO

As respostas abaixo apresentam uma solução esperada. Em exercícios de produção, outras respostas podem estar corretas se respeitarem a estrutura pedida.

## 1. Present Continuous

### Ex. 1

- a) is
- b) are
- c) am
- d) is
- e) are

Comentário: o auxiliar depende do sujeito: I → am; he/she/it → is; you/we/they → are.

### Ex. 2

- a) is checking
- b) is processing
- c) are developing
- d) am reading
- e) is sending

Comentário: Present Continuous = am/is/are + verbo com -ing.

### Ex. 3

- a) The programmer is developing an application.
- b) The student is studying English.
- c) The computer is processing the data.
- d) The technician is installing the program.
- e) The users are accessing the system.

Comentário: além de acrescentar am/is/are, o verbo principal recebe -ing.

### Ex. 4

- a) is running
- b) are installing
- c) am studying
- d) is processing
- e) are learning

Comentário: observe o sujeito antes de escolher am, is ou are.

### Ex. 5

Respostas possíveis: The technician is working in a computer laboratory. / He is installing a new operating system. / Two students are watching the installation process. / The technician is installing software. / The students are watching the technician.

Comentário: o importante é manter a estrutura sujeito + am/is/are + verbo-ing.

## 2. Simple Present

### Ex. 1

- a) processes
- b) repair
- c) stores
- d) create
- e) executes

Comentário: na terceira pessoa do singular (he/she/it), o verbo recebe normalmente -s/-es. Nos demais sujeitos, usa-se a forma base.

### Ex. 2

- a) The computer does not (doesn't) process data.
- b) The technician does not (doesn't) repair the server.
- c) The system does not (doesn't) store information.
- d) The programmer does not (doesn't) develop software.
- e) The computer does not (doesn't) use electricity.

Comentário: com does not, o verbo principal volta à forma base: processes → does not process.

### Ex. 3

- a) Does the computer process data?
- b) Does the technician repair computers?
- c) Does the server store information?
- d) Does the programmer develop software?
- e) Does the system use an operating system?

Comentário: em perguntas com he/she/it, usamos Does + sujeito + verbo base.

### Ex. 4

- a) Do
- b) Does
- c) Do
- d) Does
- e) Do

Comentário: Do acompanha I/you/we/they; Does acompanha he/she/it.

### Ex. 5

- a) Yes, it does. b) Yes, it does. c) Yes, he/she does. d) Yes, he/she does. e) A computer does not (doesn't) process information.

Comentário: nas respostas curtas, o auxiliar da pergunta é repetido: Does → does. Na negativa, does not faz o trabalho de marcação da terceira pessoa.

## 3. Simple Past — Verb To Be

### Ex. 1

- a) was
- b) were
- c) was

- d) were
- e) were

Comentário: was é usado com I/he/she/it; were com you/we/they.

### Ex. 2

- a) The computer wasn't large.
- b) The machines weren't cheap.
- c) ENIAC wasn't small.
- d) The technicians weren't students.
- e) The computers weren't fast.

Comentário: was not = wasn't; were not = weren't.

### Ex. 3

- a) Was the computer expensive?
- b) Were the machines large?
- c) Was ENIAC a computer?
- d) Were the technicians responsible?
- e) Were the computers reliable?

Comentário: com o verbo to be no passado, não usamos did. O próprio was/were vai para o início.

### Ex. 4

- a) Was
- b) Were
- c) Were
- d) Was
- e) Were

Comentário: a escolha depende do sujeito que vem depois.

### Ex. 5

- a) No, they weren't. b) Yes, they were. c) Yes, it was. d) Yes, it was. e) The first computers weren't large.

Comentário: respostas curtas usam were/weren't ou was/wasn't conforme o sujeito.

## 4. Simple Past — Regular Verbs

### Ex. 1

- a) repaired
- b) developed
- c) used
- d) installed
- e) processed

Comentário: esses verbos são regulares. A forma afirmativa do passado é formada com -ed, respeitando pequenas regras ortográficas.

### Ex. 2

- a) checked
- b) developed

- c) installed
- d) processed
- e) created

Comentário: o marcador de tempo yesterday/last week ajuda a identificar o passado.

### Ex. 3

- a) worked → work
- b) developed → develop
- c) processed → process
- d) created → create
- e) installed → install

Comentário: remova -ed para recuperar a forma base nesses casos.

### Ex. 4

- a) installed
- b) developed
- c) checked
- d) created
- e) worked

Comentário: use o significado da frase para selecionar o verbo adequado.

### Ex. 5

- a) Last Monday. b) He checked the computers. c) He installed new software. d) He tested the system. e) He created a technical report.

Comentário: as respostas estão diretamente relacionadas às ações narradas no passado.

## 5. Generations of Computers

### Ex. 1

- a) True
- b) False
- c) True
- d) True
- e) True

Comentário: microprocessors aparecem na quarta geração; a primeira usava vacuum tubes.

### Ex. 2

- a) vacuum
- b) transistors
- c) circuits
- d) microprocessors
- e) intelligence

Comentário: cada resposta identifica a tecnologia central de uma geração.

### Ex. 3

- 1 → Vacuum tubes

- 2 → Transistors
- 3 → Integrated circuits
- 4 → Microprocessors
- 5 → Artificial Intelligence

Comentário: relacione geração à tecnologia principal.

#### Ex. 4

- a) Vacuum tubes and magnetic drums for memory.
- b) They were room-sized / expensive / generated massive heat / consumed a lot of electricity.
- c) Transistors.
- d) Operating systems and multitasking; integrated circuits were the core technology.
- e) AI, parallel processing and ultra-large scale integration.

Comentário: procure no texto a informação associada a cada geração.

#### Ex. 5

Resposta livre. Exemplo: The first generation used vacuum tubes. The second generation used transistors. The third generation used integrated circuits. The fourth generation used microprocessors. The fifth generation uses artificial intelligence.

Duas frases no passado podem ser: The first generation was expensive. / The second generation was smaller.

Comentário: a produção deve respeitar a informação do texto e o tempo verbal solicitado.

## 6. The First Americans

#### Ex. 1

- a) True
- b) False
- c) True
- d) True
- e) True

Comentário: o texto afirma que eles viviam no New World antes da chegada dos europeus.

#### Ex. 2

- a) New
- b) buffalo
- c) salmon
- d) corn
- e) Arizona

Comentário: todas as palavras aparecem explicitamente no texto.

#### Ex. 3

- 1-d
- 2-b
- 3-e
- 4-a

5-c

Comentário: são formas no Simple Past de ações realizadas no passado.

#### Ex. 4

- a) In the New World / North America.
- b) Buffalo.
- c) Salmon.
- d) Corn.
- e) Yes, they did.

Comentário: em perguntas com did, a resposta curta usa did/didn't.

#### Ex. 5

Respostas variáveis. Exemplos de verbos: lived, arrived, hunted. Substantivos: buffalo, salmon, corn. Localização: in America, in the rivers of Canada. Frases: They hunted buffalo. They lived in peace. They farmed the land.

Comentário: não é necessário copiar exatamente as palavras sugeridas; a resposta precisa estar de acordo com o texto.

## 7. They Lived in Peace

#### Ex. 1

- a) lived
- b) hunted
- c) fished
- d) planted
- e) lived

Comentário: todos são verbos regulares no Simple Past.

#### Ex. 2

Verbos: lived, arrived, hunted, fished, planted, killed, farmed, were. Substantivos: Indians, buffalo, salmon, corn, rivers. Lugares: America, Canada, Arizona. Tempo: before Europeans arrived / many centuries before Columbus. Paz: lived in peace.

Comentário: o texto contém tanto verbos regulares no passado quanto o irregular/forma do to be "were".

#### Ex. 3

- a) Indians didn't live in the New World. b) They didn't hunt buffalo. c) They didn't fish for salmon. d) They didn't plant corn. e) They didn't live in peace.

Comentário: depois de didn't, o verbo volta para a forma base: lived → live; hunted → hunt; fished → fish; planted → plant.

#### Ex. 4

- a) Did Indians live in the New World? b) Did they hunt buffalo? c) Did they fish for salmon? d) Did they plant corn? e) Did they live in peace?

Comentário: did marca o passado na pergunta, por isso o verbo principal fica na forma base.

#### Ex. 5

- a) North American Indians. b) A long time before Europeans arrived. c) Buffalo. d) Salmon. e) In Arizona. f) Yes, they did. g) Europeans / the white men.

Comentário: "did" aparece nas perguntas, mas o verbo principal volta à forma base.

## 8. The Evolution of Technology

### Ex. 1

- a) False
- b) True
- c) True
- d) False
- e) True

Comentário: early computers eram grandes; transistors substituíram vacuum tubes; computadores modernos são mais rápidos.

### Ex. 2

Simple Past: changed, were, used, consumed, developed, replaced, improved. Simple Present: are, use, process, perform. Tecnologia: computers, vacuum tubes, transistors, integrated circuits, artificial intelligence.

Comentário: algumas palavras podem aparecer em mais de uma categoria dependendo da função na frase; identifique o verbo pelo contexto.

### Ex. 3

- a) Vacuum tubes. b) Transistors. c) Integrated circuits. d) For work, study, communication and entertainment. e) AI can process information and perform different tasks.

Comentário: as respostas são encontradas diretamente no texto.

### Ex. 4

People do not (don't) use the Internet to communicate. / Do people use the Internet to communicate? AI does not (doesn't) process information. / Does AI process information?

Comentário: no Simple Present, use do/does para negativa e interrogativa.

### Ex. 5

Resposta livre. Exemplo: Early computers were large. Transistors replaced vacuum tubes. People use computers for work. Modern devices use AI. Engineers are developing new technologies.

Comentário: a última frase precisa estar no Present Continuous.

## 9. A Computer Technician

### Ex. 1

- a) Simple Present
- b) Present Continuous
- c) Simple Past
- d) Simple Present
- e) Simple Past

Comentário: works/checks indicam rotina; is installing indica ação em andamento; repaired/created indicam passado.

### Ex. 2

- a) is
- b) works
- c) is

- d) repaired
- e) created

Comentário: “John is a computer technician” usa to be; “works” é rotina; “is installing” é ação acontecendo agora; repaired/created são passado.

### Ex. 3

- a) John doesn't work in a technology company. b) He doesn't check the computers. c) John didn't repair a computer.

Comentário: Simple Present usa do/does; Simple Past usa did. Em ambos, o verbo principal volta à forma base.

### Ex. 4

- a) Does John work in a technology company? b) Does he check the network? c) Did John repair a computer?

Comentário: Does para Simple Present com terceira pessoa; Did para Simple Past.

### Ex. 5

Resposta livre. Exemplo: John works in a technology company. He checks the computers. He is installing new software. He is checking the network. He repaired a computer. He created a technical report.

Comentário: mantenha exatamente dois exemplos de cada tempo.

## 10. The Internet

### Ex. 1

- a) True
- b) False
- c) True
- d) True
- e) True

Comentário: o texto contrasta comunicação no passado com o uso atual de smartphones e computadores.

### Ex. 2

Simple Present: is, use, communicate, study, work. Simple Past: was, used, changed. Present Continuous: are using, are sending, making, sharing.

Comentário: em “are using / are sending”, temos auxiliar are + verbo-ing.

### Ex. 3

- a) use
- b) was
- c) used
- d) are
- e) are

Comentário: “are using” e “are sharing” são Present Continuous; “was” e “used” estão no passado.

### Ex. 4

People do not (don't) use the Internet to communicate. / Do people use the Internet to communicate?  
People are using smartphones. / People are not (aren't) using smartphones. / Are people using smartphones?

Comentário: no Present Continuous, a negativa coloca not depois do am/is/are e a pergunta inverte auxiliar e sujeito.

### **Ex. 5**

a) Because it is an important part of modern life and provides communication, study, work and information. b) With letters and telephones. c) Computers and the Internet. d) Smartphones and computers. e) They are sending messages, making video calls and sharing information.

Comentário: procure palavras-chave no texto para construir respostas completas.

## Resumo rápido para revisão

**Present Continuous:** am/is/are + verb-ing → The technician is working.

**Simple Present:** rotina/fato → He works. Negativa: He doesn't work. Pergunta: Does he work?

**Simple Past — to be:** was/were → The computer was large. Pergunta: Was the computer large?

**Simple Past — regular:** verbo + ed → worked, installed, developed. Negativa/pergunta: didn't/did + verbo base → didn't work / Did he work?

Regra-chave: quando DO/DOES/DID é o auxiliar da pergunta ou negativa, o verbo principal fica na forma base.  
Ex.: He works → Does he work? / He worked → Did he work?
